

# Software Engineering Basics

Martin Thoma

14. August 2018

Software is written by people with different backgrounds and strengths. Not everybody has a Software Engineering background. Those slides should help you to get the basics.

- ▶ Project: Build self-driving car
- ▶ Alice is in the US, Bob in Germany

# Project structure

```
↳ bin
↳ docs
↳ awesome_project
↳ tests
📄 setup.py
📄 tox.ini
```

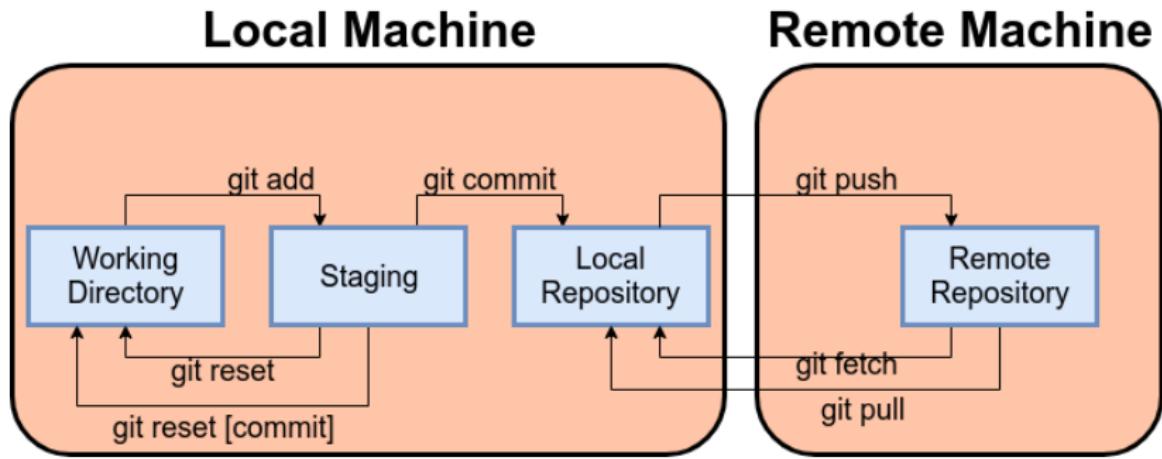

✚ `$ grep -rnLi foobar`

Details on my blog.

# git workflow

1. \$ git clone repository.git
2. \$ git add filename
3. \$ git commit
4. \$ git push

1. `$ git clone repository.git`
2. `$ git add filename`
3. `$ git commit`
4. `$ git push`

# git log

```
commit 204f2c82a5bd7379b66d351130917ec0012ec4fb
```

```
Merge: 175dab397 f7f6c7d4a
```

```
Author: Pauli Virtanen <pav@iki.fi>
```

```
Date: Sun Aug 12 14:23:38 2018 +0000
```

```
  Merge pull request #9127 from andyfaff/disablegmpy
```

```
  CI: try disabling gmpy assert
```

```
commit 175dab3978031c30c2ec7f1da641069bccaa6cc4a
```

```
Merge: 1536d17cc e677a2bb8
```

```
Author: Ilhan Polat <ilhanpolat@gmail.com>
```

```
Date: Sun Aug 12 13:27:44 2018 +0200
```

```
  Merge pull request #9131 from akahard2dj/DOC_scipy.optimize.tutorial_typo. Quetzalcoatl
```

```
  DOC: Correct the typo in scipy.optimize tutorial page
```

```
commit 1536d17cc7a741e329e1a2a85bbe3d5fd508ebcd
```

```
Merge: b87690987 9a94b31da
```

```
Author: Pauli Virtanen <pav@iki.fi>
```

```
Date: Sat Aug 11 22:40:46 2018 +0000
```

```
  Merge pull request #9129 from eric-wieser/no-bare-except
```

```
  BUG: Do not catch and silence KeyboardInterrupt/SystemExit
```

```
  Bare excepts are only correct when trying to capture and forward exceptions - in all other
```

```
  This only touches the code that is user-facing, not any of the tooling or tests.
```

# git blame

 ../../documents/letter-dsgvo/
    .gitignore
```

We read code MUCH more often than we write it.

## Problem: Dirty commit history due to bugs / fixes

[master] 5e5f8c8 feature 1 - Alice <alice@xyz.com>

[master] 1bff507 fix feature 1 - Alice <alice@xyz.com>

[master] ae89eb5 fix feature 1 - #2 - Alice <alice@xyz.com>

[master] c1bcc99 now it is really fixed - Alice <alice@xyz.com>

[master] db3bcda feature 2 - Bob <bob@xyz.com>

- ▶ PRs should not be about simple code style

- ▶ PRs should not be about simple code style
- ▶ Choose one **style guide** and stick to it

- ▶ PRs should not be about simple code style
- ▶ Choose one **style guide** and stick to it
- ▶ Trailing spaces are just noise - make your editor remove them automatically.

Beautiful is better than ugly.  
Explicit is better than implicit.  
Simple is better than complex.  
Complex is better than complicated.  
Flat is better than nested.  
Sparse is better than dense.  
Readability counts.  
Special cases aren't special enough to break the rules.  
Although practicality beats purity.  
Errors should never pass silently.  
Unless explicitly silenced.

In the face of ambiguity, refuse the temptation to guess.  
There should be one— and preferably only one —obvious way to do it.  
Although that way may not be obvious at first unless you're Dutch.  
Now is better than never.  
Although never is often better than *\*right\** now.  
If the implementation is hard to explain, it's a bad idea.  
If the implementation is easy to explain, it may be a good idea.  
Namespaces are one honking great idea – let's do more of those!
